VETERANS SERVICE CENTER (VSC)

WACO HEALTHCARE ENROLLMENT PERFORMANCE CONSOLE

This Performance Console serves as a strategic decision-support engine for the Waco VA Regional Office to restore VHA healthcare enrollment velocity and SLA compliance.

- * **Analysis Scope:** 5,000 enrollment records.
- * **Key Finding:** A 38% surge in volume has increased the average turnaround time to 9.49 days.
- * **Primary Drivers:** 44.9% technical latency in system handoffs and internal triage bottlenecks for Priority Group Upgrades.
- * **Strategic Objective:** Provide the AVSCM and VSCM with quantitative oversight to implement targeted API integrations and personnel realignments to achieve the federally mandated **5-day Service Level Agreement (SLA)**.

AVG TURNAROUND TIME

Days
9.49

The current average of 9.49 days represents a significant breach of the 5-day mandate, highlighting the urgent need for process intervention.

SLA COMPLIANCE RATE

19.70%

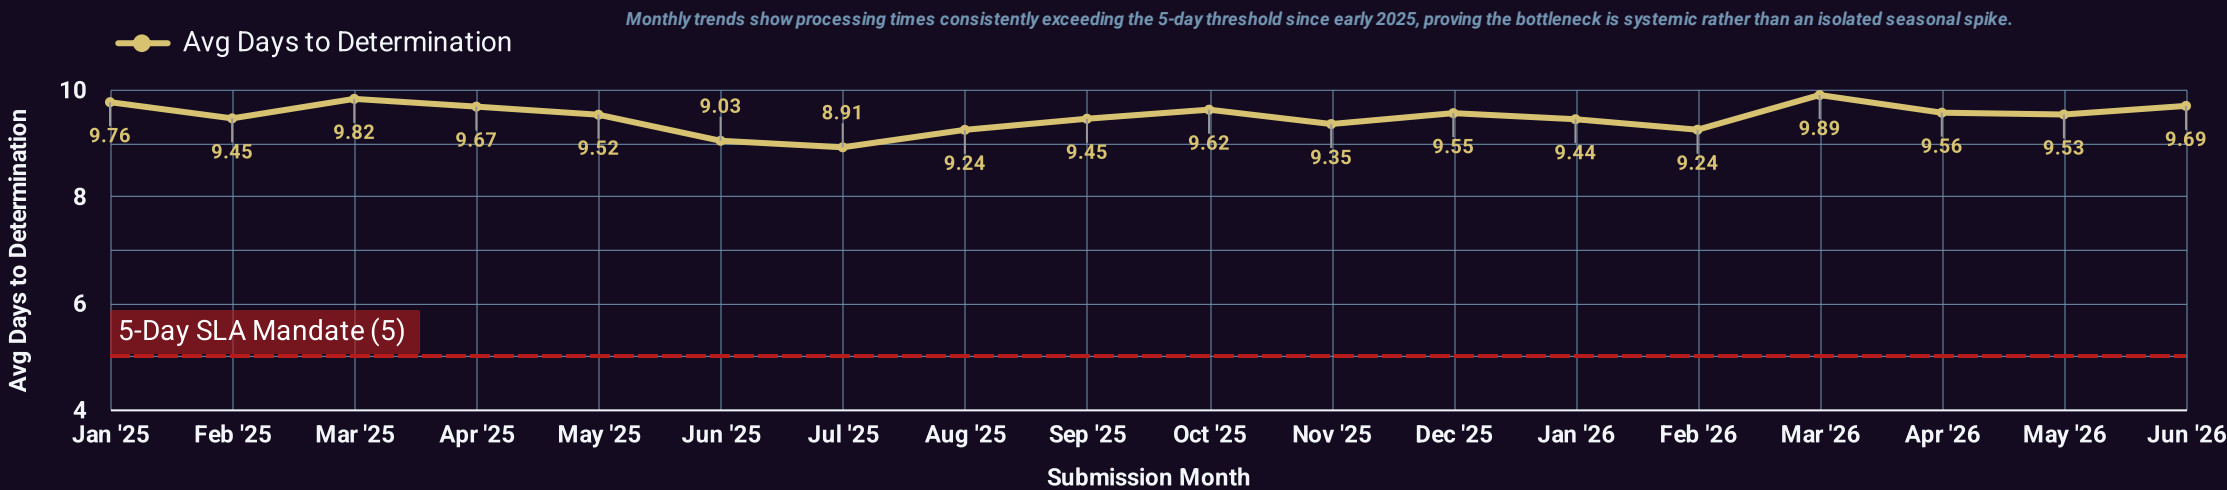

Only 19.7% of enrollments meet federal standards, signaling that four out of every five veterans are waiting longer than mandated for healthcare determinations.

TOTAL SUBMISSIONS UNDER REVIEW

5,000

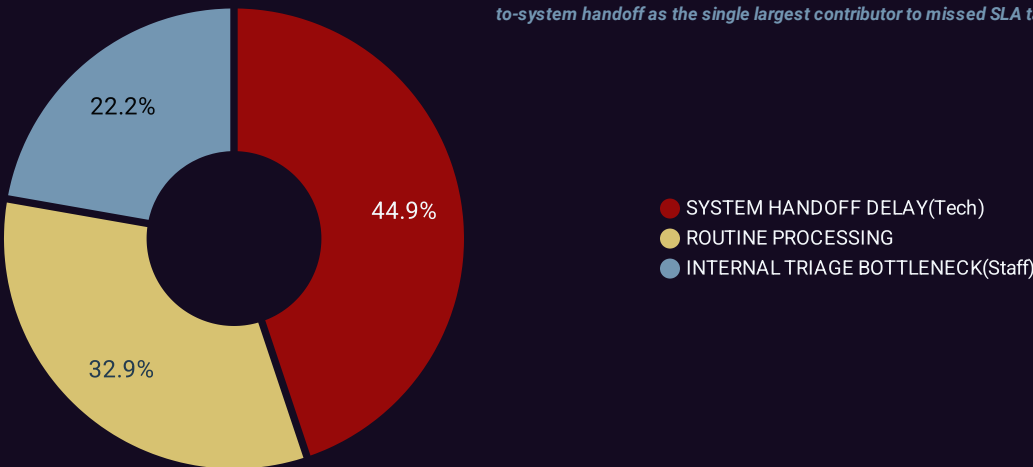

A high-volume backlog of 5,000 active records underscores the administrative strain caused by the recent 38% surge in enrollment requests.

VHA ENROLLMENT CYCLE TIME TREND: WACO REGIONAL NODE

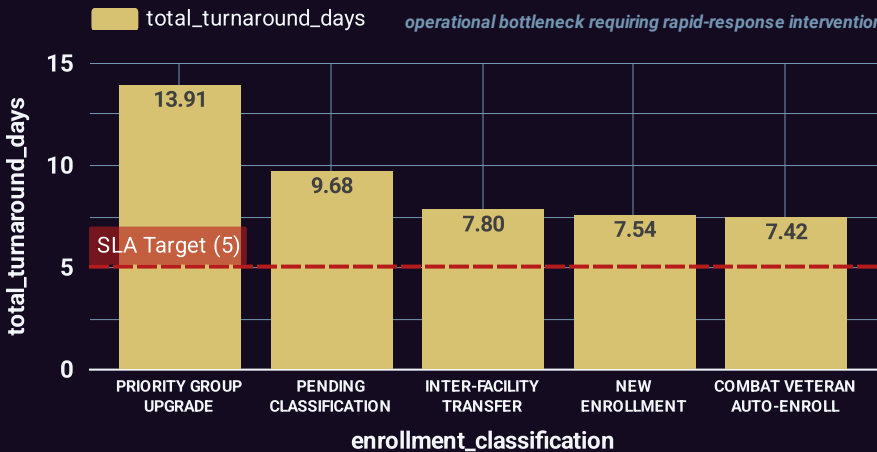

Primary Delay Attribution Breakdown

Technical latency accounts for 44.86% of all delays, identifying the system-to-system handoff as the single largest contributor to missed SLA targets.

Turnaround by Enrollment Type

Priority Group Upgrades experience the longest delays at 13.91 days, isolating manual staff verifications as the primary operational bottleneck requiring rapid-response intervention.
